

KINGSTON® PEACH TEATS

Natural rubber pull-through and screw-on teats

Works like a real cow's teat!

Other model teats are available:

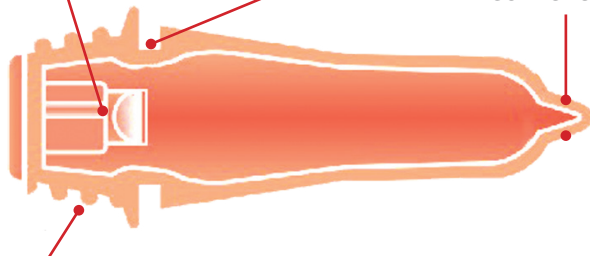

Why PEACH TEAT?

- ↳ Unique flap valve acts like a real cow's teat stimulating the calf's saliva and improving the PH-level in the stomach
- ↳ Natural rubber composition is instantly accepted by the calf
- ↳ Self-cleaning as the valve ensures against blockages

Collapsing flap-valve functions like a real cow's teat while the calf is suckling. It never closes in its relaxed state.

Slot for fitting to standard pull-through feeders

Milk openings on each side of the nipple, so the teat remains leak resistant.

Thread for easy fitting to screw-in feeders

Reversible single feeder
